**Subject:** application to move data from csv to db

Dan,

I have these files which are produced for each coil. I need an application to insert into a sql2012 db.  
The format of the files are identical.

CoilNumber,ProducedDateStamp  
GageInUse – (permitted values are 1 and 2)  
NumberOfReadings – (permitted values are 1 – 2000)  
Label1(Actual),Label2(Order),Label3(Pos Tol),Label4(Neg Tol) – (Define the next row of data)  
ActualVal1,OrderVal,PosTolVal,NegTolVal  
ActualVal2  
ActualVal3  
...  
ActualVal(n-2)  
ActualVal(n-1)  
ActualVal(n)

Thanks,

Steven Markward
